

12%+ Presale Conversion in Just 7 Days — with Zero Extra Staff

How Revryze turned a labor-intensive launch into an AI-powered, hands-free sales engine for multi-unit Drybar owners Matt & Jackie Paynter.

Client Profile & Challenge Overview

Client Background

Matt & Jackie Paynter are experienced multi-unit franchisees with the Drybar brand. With three successful locations already under management, they faced significant time constraints and operational challenges preparing to launch their fourth location in Ballantyne, NC.

As busy entrepreneurs balancing multiple businesses and family commitments, they needed a way to ensure a successful launch **without personally carrying the sales load.**

The Growth Challenge

Time Constraints

Running three existing Drybar studios left the Paynters with little time to personally oversee a pre-sale campaign for location #4.

Staffing Dilemma

The traditional route—hiring 2–3 part-time salespeople—would add overhead, increase management complexity, and reduce early-stage profitability.

Personal Balance

Launching a new studio while managing a growing family and existing locations created real stress, threatening both professional performance and personal wellbeing.

The Paynters faced the same problem most multi-unit owners encounter: **how to scale faster without burning out or lowering standards**. Their manual, people-heavy pre-sale model no longer worked. They needed leverage—systems that could sell while they slept.

The Revryze Solution

AI-Powered Revenue Operating System

Revryze implemented a customized CRM and automation stack designed specifically for franchise pre-launch and early-stage membership growth.

Smart AI Text Sequences

Intelligent SMS automation followed up with every lead instantly—answering questions, handling objections, and booking appointments 24/7 without a human sales rep.

Hands-Free Sales Engine

The system continuously learned and improved through real-time data feedback, converting leads into founding members automatically while maintaining a personal, branded tone.

Within days of launching on March 3, 2025, the system began generating daily membership sales—**no additional staff required**. Leads weren't just being managed; they were being converted automatically, freeing Matt and Jackie to focus on higher-level operations and family life.

Actual Daily Sales Reporting

(Visualized data omitted — referenced charts showed consistent day-over-day member growth within the first week.)

Actual Daily Sales Reporting

Measured Results

12%+

Conversion Rate

More than doubled the Paynters' historical pre-sale conversion rate—from under 5% to over 12%—driven entirely by AI-powered lead nurture and follow-up.

7

Days to Acceleration

Sales velocity took off within the first week post-launch, proving system adoption could deliver near-instant ROI.

0

Extra Staff Needed

No new hires. No scheduling headaches. No management burden.

Beyond the numbers, this launch marked a breakthrough in confidence and control. For the first time, the Paynters **took a family vacation during a launch**—and came back to *more* sales than when they left.

Their trust in the system grew so strong that they increased ad spend midway through the pre-sale, knowing Revryze would convert the volume profitably.

Most importantly, the studio hit its founding member goals ahead of schedule—and continues to generate automated sales and renewals months after opening.

In Their Words

“

"Headquarters was impressed by our results."

”

“

"The AI actually closed sales for us. We've never had that before."

”

“

"For the first time in a launch, we had enough confidence in the system to go on vacation—and came back to more sales."

”

That quote sums up the Revryze mission perfectly: **Operational freedom through predictable revenue.** Systems that sell so owners can step back and scale up.

Why It Worked

1

AI-Driven Automation

Revryze replaces repetitive manual sales tasks with intelligent systems that engage every lead instantly and personally—without extra payroll.

2

Franchise-Built Frameworks

Our playbooks and automations are designed specifically for the franchise model, helping operators replicate success quickly across multiple locations.

3

More Time. Less Stress. More Revenue.

The Paynters' story shows how performance systems create freedom—freeing owners from micromanagement and helping brands scale faster with confidence.
